Professional Summary

Software Developer with 3+ years of experience (including internship) building scalable, responsive web applications with React.js, Next.js, and TypeScript. Experienced in RESTful API integration, ETL workflows, and full-stack development with FastAPI and PostgreSQL — including AI-powered products integrating LLMs such as Claude and Gemini.

Technical Skills

Languages: JavaScript, TypeScript, Python, HTML, SCSS / CSS
Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, Material UI, Ant Design, Shadcn UI, Bootstrap, Vite, Recharts, Framer Motion, CSS & SVG Animations
Backend: Node.js, Express, FastAPI, SQLAlchemy, PostgreSQL, MongoDB, JWT Authentication, REST APIs
AI: LLM API Integration (Claude, Gemini, OpenRouter), Prompt Engineering
Tools & Platforms: Git, GitHub, GitHub CI/CD, Vercel, Cloudinary

Experience

Software Developer May 2024 – Present
Trident Techlabs Ltd *New Delhi, India*

- Developed and maintained scalable, responsive web applications using **React.js**, **Tailwind CSS**, **Bootstrap 5**, and **Material-UI**.
- Integrated complex internal and third-party **RESTful APIs**, enabling real-time data flow and enhancing application interactivity.
- Collaborated closely with UI/UX designers to translate wireframes into pixel-perfect, functional interfaces, leading to a **20% improvement in user engagement** metrics.
- Engineered and streamlined **ETL workflows**, improving the speed and reliability of data processing for core application features.
- Actively participated in an **agile** development environment, contributing to code reviews and sprint planning to ensure high-quality, on-time project delivery.

Software Developer Intern Sep 2023 – Apr 2024
Trident Techlabs Ltd *New Delhi, India*

- Collaborated with developers to build and debug responsive **React.js** UI components using **MUI**, reducing feature delivery cycles.
- Integrated **third-party APIs**, troubleshooting data flow issues and improving communication reliability between client and backend services.
- Identified and resolved **40+ UI bugs** across modules, boosting application stability and user experience ratings.

Projects

Async (TASQ) | *Next.js, Redux Toolkit, TypeScript, FastAPI, PostgreSQL, Cloudinary* tasqmanage.vercel.app

- Built a full-stack **task and project management platform** with Kanban boards, subtasks, comments, attachments, time logs, team management, notifications, and automation rules.
- Designed a **FastAPI** + **PostgreSQL** backend with **JWT authentication** and Cloudinary file storage, deployed on Vercel.

Pocket CFO | *React, TypeScript, Vite, Tailwind CSS, Recharts, Framer Motion, FastAPI, PostgreSQL* pocketcfogem.vercel.app

- Built an **AI-powered personal finance dashboard** that tracks net worth, burn rate, and cash runway, and automatically flags risky spending.
- Integrated **Gemini, Claude, and OpenRouter** LLM APIs for Hinglish CFO advice, plus FIRE, tax, and what-if financial simulators.

Education

Chandigarh University
Master of Computer Applications (MCA) — Specialization: Cloud Computing & DevOps *Jul 2021 – May 2023*

Guru Gobind Singh Indraprastha University New Delhi, India
Bachelor of Vocational Studies in Software Development *Jul 2018 – May 2021*

Certifications

Claude 101 (Anthropic) | AI Fluency: Framework and Foundations (Anthropic) | Introduction to Generative AI Studio (Google Cloud · Simplilearn)
