## PROFESSIONAL SUMMARY

Frontend Software Developer with 2 years of experience building scalable, high-performance web applications with React.js, TypeScript, and modern UI frameworks. Proven track record in architecting GIS mapping interfaces, designing RESTful API integrations, and delivering role-based access systems in production environments. Passionate about clean, maintainable code and performance optimization.

## EXPERIENCE

### Software Developer

May 2024 – Present

Trident Techlabs Ltd, New Delhi, India

- Architected and delivered a dynamic admin panel from the ground up using React.js and Tailwind CSS, implementing full CRUD operations and a role-based permissions system that reduced unauthorized access incidents by 100%.
- Engineered a responsive GIS mapping interface with JavaScript, MUI (Material UI), and Bootstrap, improving spatial data visualization performance by 30% and significantly enhancing the user experience (UX).
- Led the design and integration of RESTful APIs to manage large-scale datasets, streamlining data flow and reducing frontend load latency by 25% by optimizing request payloads and response handling.
- Conducted comprehensive testing and debugging cycles across the full application stack, ensuring application stability and maintaining 99.9% uptime in production environments.

### Software Developer Intern

Sep 2023 – Apr 2024

Trident Techlabs Ltd, New Delhi, India

- Collaborated with senior developers to build and debug responsive React.js UI components using MUI (Material UI), contributing to a 15% improvement in component reusability across the codebase.
- Integrated third-party APIs, troubleshooting data flow issues and improving the reliability of frontend-to-backend communication pipelines.
- Identified and resolved UI bugs across multiple modules, contributing to improved application stability and a smoother user experience during the product launch.

## PROJECTS

### CYMEWEB | React.js, Bootstrap, MUI (Material UI), Ant Design

May 2024 – Present

- Engineered a feature-rich dashboard interface for a major utility client, delivering interactive data visualization components and analytics panels that serve real-time operational data.
- Integrated multiple UI component libraries (Bootstrap, MUI (Material UI), Ant Design) within a unified design system, ensuring cross-browser consistency and WCAG accessibility compliance.
- Developed pixel-perfect, responsive frontend components for a client portal from Figma mockups, significantly reducing QA revision cycles.

### Admin Panel | React.js, Tailwind CSS

2024

- Designed and implemented a reusable CRUD application for user management with a clean component-based architecture, demonstrating frontend engineering best practices.
- Implemented a secure mock authentication flow using JWT token simulation and protected routing, showcasing an understanding of modern web security patterns.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3

**Frontend Frameworks & Libraries:** React.js, Tailwind CSS, MUI (Material UI), Bootstrap, Ant Design

**APIs & Data:** RESTful APIs: Design and Integration, JSON, async/await, Fetch API

**Tools & Platforms:** Git, GitHub, VS Code, npm, GIS Mapping Libraries

**Concepts:** Component-Based Architecture, Responsive Design, CRUD Operations, Role-Based Access Control (RBAC), Performance Optimization, Cross-Browser Compatibility

## EDUCATION

### Master of Computer Applications (MCA)

Jul 2021 – May 2023

Chandigarh University — Specialization: Cloud Computing & DevOps

### Bachelor of Vocational Studies in Software Development

Jul 2018 – May 2021

Guru Gobind Singh Indraprastha University, New Delhi, India
